SUPPLEMENT

1. In early January 1947 the armament plant at Kragujevac, which employs about 7,000 workers, was being used for experiments with small Soviet rockets under the supervision of Soviet technicians. These rockets are designed to be fired by special infantry units and it is intended to equip the Yugoslav Army with these new weapons.

() Comment: This information appears to confirm several earlier claims that V-1 and V-2 projectiles are being manufactured in southern Yugoslavia. Kragujevac has previously been specifically mentioned [see () "V-Weapon Sites" of ()] as a manufacturing place for V-2's "under direction of Soviet and German technicians".
